PROFILE

Software Engineer trained through self-study and intensive technical instruction at ITI. Experienced in building complete web applications, from backend APIs and database structures to responsive frontend interfaces. Familiar with Agile methodologies, seeking a software role to contribute to real-world applications and grow alongside an experienced team.

INTERNSHIPS

Information Technology Institute (ITI) January – June 2026
Intensive Code Camps (ICC) – Web Development & Generative AI
Coursework covered responsive design, UI/UX principles, Progressive Web Apps, and REST/GraphQL API integration. Built a foundation in operating systems, networking, software design patterns, unit testing, and Agile methodologies.

Projects:

E-Commerce Admin Dashboard | Next.js, MongoDB | github.com/samybit/iti-ecommerce-admin

- Developed an administrative dashboard prototype in a 5-person team, handling structured JSON data.
- As Auth Lead, engineered authentication pipelines and route protection middleware.

Movie Discovery App | React, Tailwind CSS, Shadcn UI | iti-movie-app.pages.dev

- Co-developed a responsive movie web app, handling asynchronous data fetching and API integration.
- As UI/UX Lead, built the component interface, implementing mobile-first layouts and dynamic theming.

Creator Engine | Next.js, Express.js, Turborepo | github.com/Mina13323/creator-engine

- Co-developed an AI-native venture builder platform, a RAG pipeline and serverless backend architecture.
- Developed chat and studio interfaces featuring full-stack chat, memory agents, and RAG.

PROJECTS

Nexus Board | Next.js, PostgreSQL, Prisma | bento-game-tracker.vercel.app

- Implemented strict LLM guardrails to generate structured JSON tasks from user prompts.
- Designed a locked-viewport "Bento Grid" UI using Tailwind, featuring Framer Motion animations.

Automated Scraper | Flask, Python, BeautifulSoup, n8n, Docker | github.com/samybit/freelance-lead-scraper

- Engineered an automated microservice pipeline to extract, parse, and structure web data.
- Processed extracted data into formatted daily email reports delivered via SMTP.

SKILLS

Languages & Frontend: HTML5, CSS3, JavaScript / TypeScript, React / Next.js, Angular, jQuery, AJAX.
Backend & Databases: Node.js, NestJS, Spring Boot, Java, PostgreSQL / Prisma, MongoDB, GraphQL.
AI & Automation: RAG Pipelines, Prompt Engineering, LLM Integration, Agentic Workflows.
DevOps & Tools: Docker, Linux, Git, Jira, Postman.

COURSES

Center for Credentialing & Education Career Management Program	February 2026
CS50 (edX) Introduction to Computer Science	December 2025
Egypt FWD (MCIT) Data Analysis	September 2021

EDUCATION

Ain Shams University
Bachelor of Business Administration (B.B.A.)

- Relevant Coursework: Accounting, Finance, Project Management, Economics.

2019 – 2023

LANGUAGES

Arabic: Native
English: Professional Working Proficiency

ADDITIONAL INFO

Military Service: Completed

April 2024 – June 2025
