PROFILE

Software Engineer who spent the last years self-studying programming before refining these skills at ITI. I enjoy building clean, functional software by pairing modern full-stack technologies with practical Generative AI integrations. I am comfortable taking ownership within Agile teams, having led both frontend and authentication architectures on complex platforms. My primary focus is on writing maintainable code and delivering systems that perform exactly as expected.

INTERNSHIPS

Information Technology Institute (ITI) – Minya Branch January – June 2026
Intensive Training Program (ITP) – Web Development & Gen AI

Coursework covered RAG, Agentic software, Prompt Engineering, UI/UX principles, Progressive Web Apps and responsive design. Built a foundation in operating systems and networking, while emphasizing software design patterns, unit testing, NoSQL/GraphQL backend integrations, and Agile methodologies.

Projects:

E-Commerce Admin Dashboard | Next.js, MongoDB | github.com/samybit/iti-ecommerce-admin
• Co-developed a full-stack administration dashboard in a 5-person team, integrating NextAuth.js.
• As Auth Lead, engineered secure authentication and route protection middleware.

Movies Database | React, Tailwind CSS, Shadcn UI | github.com/samybit/iti-movie-app
• Co-developed a movie discovery application in a 4-person team, integrating the TMDB API and Firebase.
• As UI/UX Lead, engineered the frontend using Shadcn UI, implementing i18n and dynamic theming.

Creator Engine | Next.js, Express.js, Turborepo | github.com/Mina13323/creator-engine
• Co-developed an AI-native venture builder platform, a RAG pipeline and serverless backend architecture.
• Developed AI Co-Founder and Studio modules featuring full-stack chat, memory agents, and RAG.

PROJECTS

Nexus Board | Next.js, Prisma, PostgreSQL | bento-game-tracker.vercel.app
• Implemented strict LLM guardrails to generate structured JSON tasks from user prompts.
• Designed a locked-viewport "Bento Grid" UI using Tailwind, featuring Framer Motion animations.

Automated Scraper | n8n, Python, Flask, BeautifulSoup, Docker | github.com/samybit/freelance-lead-scraper
• Engineered a self-hosted automation pipeline and a custom Python microservice for web scraping.
• Leveraged the Gemini API to extract key insights and orchestrate formatted daily email digests via SMTP.

SKILLS

AI & Automation	Languages & Frontend	Backend & Databases	DevOps & Tools
RAG Pipelines	JavaScript / TypeScript	NestJS	Docker
LLM Fine-Tuning	Python	Flask	Jenkins
Prompt Engineering	React / Next.js	Redis	Linux
Langflow	Angular	MongoDB / Mongoose	Git / Jira
n8n	Tailwind CSS	PostgreSQL / Prisma	GraphQL / Postman

COURSES

Center for Credentialing & Education Career Management Program	February 2026
CS50 (edX) Introduction to Computer Science	December 2025
Egypt FWD (MCIT) Data Analysis	September 2021

EDUCATION

Ain Shams University
Bachelor of Commerce (B.Com) in Business Administration

2019 – 2023

LANGUAGES

Arabic: Native

English: Professional Working Proficiency

ADDITIONAL INFO

Military Service
Completed – one year of service as a soldier

April 2024 – June 2025
